Values Integration Appraisal Process

Highlighting the values that guide and inspire our organization to be a compassionate Catholic health care facility.

2018 has been a busy year for the VIA Process and our CHI facilities. Site visits happened at Hotel Dieu Grace Healthcare in Windsor in January, at St. Joseph's Continuing Care in Cornwall in April and at Hôpital-Stella-Maris-de-Kent in Sainte Anne-de-Kent in June. During these three surveys over 500 people participated by filling out the on-line survey and approximately 150 were part of focus groups during the site visit.

One theme that was evident in all three surveys was that of change. These facilities have experienced a great deal of change in the past years yet still were able to maintain strong emphasis on mission, vision and values. One staff member who participated in the process noted "people who work here treat everyone as their family and that is why our clients feel welcomed." A patient/resident was very pleased to be involved in the survey and the site visit and noted "I love it here... staff live the mission. This is my number one choice."

As part of the VIA Process assessors work with the local coordinator and the leadership team at the facility to explore the areas of Values Driven Holistic Care, Spirituality, Community Relations, Communication, Employee Relations, Mission Integration and Ethical Practice. The Assessors then give feedback to the facility on these themes with an emphasis on areas to celebrate and suggestions for growth

The VIA Process is currently underway at St. Joseph's Hospital in Dalhousie, NB and St. Bernard Hospital in Chicago. We are very proud of the work that is being done in our facilities.

Assuring values in Catholic health care.
